STANKO ABADŽIĆ
AKTOVI

Aktovi i studije figura Stanka Abadžića imaju svu senzualnost i senzitivnost nekoga tko promatra svoje modele s nježnošću i velikom ljubavlju. Njegove apstraktne i modernističke slike – često s primjesom nadrealizma – podsjećaju me na češkog fotografa Františka Drtikola. No najveći dio njegovih fotografija modela snimljen je u svakodnevnijim ambijentima, što njegovu djelu donosi intimnost koja je rijetka i katkad magična.

Stanko Abadžić's photographs of nudes and figure studies have all the sensuality and sensitivity of someone who views his models with tenderness and more than a bit of love. His abstract and modernist images – often with a touch of surrealism – remind me of the Czech photographer František Drtikol. But the bulk of his photographs of models are in more everyday settings, bringing an intimacy to his work that is rare, and, at times, magical.
